About QSE

The combined experience of QSE's Lean Experts exceeds more than 20 years in successful Lean training, implementation along with effective ISO implementation and problem solving techniques. QSE's major asset is a well-established Lean Curriculum developed by highly qualified Lean Experts. QSE is well equipped with its experienced and problem solving oriented consultants. Our consultants possess hands-on Lean Implementation experience to effectively apply to Box/Packaging industry.

QSE is an associate member of Association of Independent Corrugated Converters (AICC) and has worked with several AICC members in assisting them with their ISO registration needs. Thus, QSE is very much **aware of the working of the box/packaging plants** – an awareness which would be of great advantage in working with your organization.

QSE

Lean Enterprise

Experts in Lean Training and Implementation to Achieve Bottom-line Results

We specialize in Box/Packaging Industry

**REDUCE WASTE IN ALL AREAS
NOT JUST MANUFACTURING**

About QSE's Lean Enterprise

Quality Systems Enhancement, Inc. is a leading Consulting and Training organization, servicing the Box/Packaging industry since 1992. QSE has developed a proven 10-step approach to improve bottom-line results in the application of lean tools & concepts. This comprehensive approach toward a Lean Enterprise, consists of a unique blend of assessing, consulting, and training, which is not only designed for Management, Administrative, and Manufacturing but Non-Manufacturing processes as well! This Approach clubbed with problem solving and ISO principles is specifically designed to produce results at all levels.

The QSE Objective

At Quality Systems Enhancement, Inc. our objective for Lean Enterprise is to achieve bottom-line results. QSE's Lean Enterprise focuses on:

- ✓ Implementation and NOT just training
- ✓ All Non-manufacturing areas and NOT just manufacturing
- ✓ Problem Solving and NOT just Problem Identification
- ✓ Combining ISO, Lean & Problem Solving

QSE's Strengths

Our strength is in our thorough knowledge of Box/Packaging Industry. Our experience in effectively delivering promised bottom-line results by applying simplistic ISO concepts, Problem Solving and adequate Lean Implementation techniques.

Our other notable strength's are:

- ✓ Customer Focus
- ✓ Customer Satisfaction
- ✓ Customer Commitment
- ✓ Outstanding Track Record
- ✓ Qualified and Competent Professionals

QSE's Proven 10 Step Approach

1 Lean Tools/Concepts Training

2 Selection of Lean Tools/Concepts

3 Baseline Assessment of Identified Waste

4 Train the Implementation Team for the Application of the Selected Tools Concepts

5 Assist in Implementing Selected Tools/ Concepts

6 Develop Goals With Measurement/ Metrics

7 Measure Performance/Apply Quotation to Cash Principle & Process Approach (ISO)

8 Maximize/Optimize Implementation Effectiveness for Bottom Line Improvement

9 Incorporate Results into Standardized Procedures

10 Management Review of Accomplished Results

The QSE Difference

- ☐ To achieve desired results, we are unique in combining:
 - ✓ ISO
 - ✓ Lean Tools/Applications
 - ✓ Problem Solving
- ☐ QSE's '10 Step Approach' is designed to accomplish bottom-line improvement to be competitive.
- ☐ We don't just train on Lean, we effectively implement to enhance customer satisfaction
- ☐ We don't just focus on Manufacturing, we focus on all Non-Manufacturing areas as well
- ☐ We don't just stop at Problem Identification, we assist you in Problem elimination as well
